Order

SECTION
FILE No. 35-91
SER'AL No. 1

The attention of Deputy Commissioners of Districts is drawn to Subject No 278 (Government Minor Forest Produce should be sold when the trees are in bearing) brought up at the meeting of the Dasana Representative Assembly held in October last, and the Deputy Commissioners are requested to submit full reports on the Subject to getter with their proposals, if any, and a Statement showing for each Minor Forest Produce, the period of the year when it is available for collection the time when in each of the past 5 years it was sold

and the account for which it was purchased at such sale. The Reports should be submitted through the Inspector General of Forests, who will send them up with his views and proposals for the realisation of the best revenue under this head.

Drawing attn of Dy Cos to subject No 278 of the Dasana Rep: and forgo (Sirsi minor forest produce should be sold when the trees are in bearing) & requiring them to submit a full report on the subject with their proposals and certain other statistics.

To

The Deputy Commissioners of Districts.

Copy to Insp. Gl of Forests & Planters for info.

Enclosure No 3

Mysore District

Subject No. 278.

Government Minor Forest produce should be sold when trees are in bearing.

Summary of discussion.—Minor Forest produce is sold in April and May. It should be sold later in the year when the trees are in bearing. This would help intending purchasers to judge better what they may offer at auction. Bees' wax, honey, horns and such like may be sold in April and May as at present.

Dewan's reply.—The subject will be referred to the Forest Department for consideration.

The Rest are all Enclosures to 8 & 9

} dated 12th September 1891.

Proceedings No: 3882-90/71
dated 2nd. July 1891

Subject No: 27 (Jalari)
discussed at The Mysore Representative Assembly 1890

Memo furnishing information on the several points referred to in the marginally noted proceedings of Government.

This District is not noted for any extensive growth of Jalari trees fit for timber except in the Chickballapur Taluk and parts of the Srinivaspur Sub-Taluk nor have there been any applications from the raiyaths or others for licenses to cut the trees for timber.

2. The existing trees are generally used for lac, and may well continue to be reserved for the improvement of Revenue from lac which is at present but small. Over mature trees unfit for producing lac may be given out for timber on payment of a deigniorage fee of Rs 3 per tree.

3. The occassion for the grant of, and the necessity for thinning the trees being scarce, no reduction in the existing rate of fee for the same is called for in this District.

Subject No: 28 (Jambe)

4 If by "Jambe tree" is meant the Sibe tree (Guava) which yields an edible fruit; its growth in the District is inconsiderable and the wood thereof is not used for building purposes

If

for sale. For these reasons no change in the existing practice is desirable as it is unlikely that it will prove beneficial either to Government or to the purchasers. A statement showing the Revenue realized in the District from the Forest Minor Produce during each of the past five years, the probable dates when such produce is available for collection and the dates on which sales were held during each year is hereto attached.

the report called for
in Government Proceedings
No: 4146-54/80 of 4th July
1891 about the selling of
the minor forest produce
when the trees are in
bearing would be sent
on the receipt of reports
from Amildars.

In continuation of
the above has the honor
to forward a Statement

as

as desired in the said proceedings shewing the realizations from Minor Forest Produce during the past 5 years. As the different items of this minor Forest produce are sold not separately, but together the realization from each of them cannot be given.

2. The time for harvesting the several items of this minor Forest produce is not the same but it extends over the whole of the year, as can be seen from the statement. Throughout that period it is necessary that the produce should be carefully watched from being taken away. If the sale were to be delayed till the trees are actually in bearing as proposed by the Dasara representative members Government will have to guard them and it is doubtful if this can be done efficiently. An idea of the yield can probably be formed when the trees are in blossom and this is generally the time that the sales are now held. Hence no alteration seems to be necessary in the existing practice.

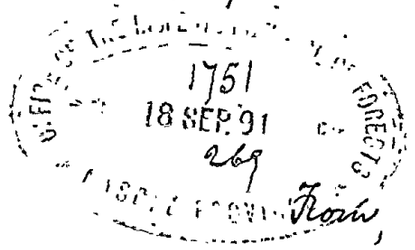
No. 469 Enc 2



Deputy Commissioner's Office,
Mysore District
Dated Mysore 12/16 September 1891

To,
D. Nanjaeud Row Esquire
Off'g Deputy Commissioner

The Inspector General of Forests
and Plantations, in Mysore

Sir,

With reference to Government Order No. 4146-54/Cii 80 dated 4th July last, calling for a report on the subject of selling "Minor Forest Products" when trees are in bearing (Subject No 2.78 brought up at the meeting of the last Dassara Representative Assembly) I have the honor, in submitting herewith a statement shewing the periods when the several Minor Forest products are available for collection and the amount of revenue realized by the sale of the products during the past years, to state that the collection season of Deer horns, wax and honey is between April and November, and that of the other forest products between November and March. At present the sales are held in

April

April or May in each year so that the Contractor may have almost the full year at his disposal to collect the produce, the right to which he purchases. If, as requested by the members of the Representative Assembly, the date of sale were to be fixed when trees are in bearing or when the products are available for collection, more than one sale will have to be held. This arrangement will, it is feared, not only cause inconvenience to the Contractors but also to Government.

Under this arrangement different items of produce may be taken up by different persons and there may be clashing of interest between them.

The present system is working satisfactorily from a very long time, and I am of opinion that no change is necessary. I may suggest that instead of holding the sales in April or May they may be held before the beginning of the official year to which the contract relates: that is in March.

The Assistant Conservator whose opinion

opinion had been invited suggests that contracts may be given for lengthened period. I am not in favor of this system; because there is chance of loss to Government in good years, and difficulty of realizing the amount of contract in unfavorable ones. A copy of the Assistant Conservator's Memorandum on the subject is enclosed for reference.

I have the honor to be,

Sir,

Your most obedient servant,

D. Macnabb

Off g Deputy Commissioner,

Mysore District.

MM

Memorandum

Subject :—

Government minor Forest Produce proposed to be sold when the trees are in bearing-vide subject no. 278 brought up at the meeting of the Dassara Representative assembly held in October last.

Period of the year when the products are available for collection

Gallnuts ripen in the months of December and January and are collected during those months as well as in March. Dindal trees exude gum, deer shed their horns between January and march. Soapnut ripens in the same period - Bees wax and honey are available during the greater portion of the year chiefly between April and November. The other minor Forest products which are given in the printed list herewith appended are available between November and march but they are collected in small quantities for want of demand: while a few of them are confined to certain special tracts. and are found only in small quantities.

The sales were held during the last 5 years between the months of April and May of every year. ~~[illegible]~~ But in the last 2 years there was some delay in sanctioning or cancelling the sales as results had to be held in some cases for want of proper bids on the first occasion.

The time of Minor Forest products sold during last 5 years

The amount realized from each item cannot be given as all the minor forest products were sold collectively by taluk, the same purchaser in a generally different people purchased the products in different taluks. A statement of revenue thus realized is given below:-

Revenue derived from each item during the 5 years.

Name of Taluk	1886-87	1887-88	1888-89	1889-90	1890-91.	Total

Opinion on the period for which Contract should be given in future.

At present minor Forest Products in each Taluk are sold annually and the period of Contract extends over one year; and this short duration hardly allows purchasers to derive much advantage. They therefore hesitate to bid properly at the annual sales. In my opinion it would be advisable to extend the term of Contract to three years in the case of every Taluk. There are many reasons for recommending extension a few of which may be explained as follows:—

(1) Jackwood trees do not bear the same quantity or quality of fruit every year; in one year they yield a luxuriant crop which in the next year is moderate, while in the third year they bear no fruit at all. This is not the case with a group of trees in any particular tract but the habit of unequal bearing differs considerably among different trees which grow on the same locality though climatic and other local conditions remain the same.

(2) The quantity and quality of fruit are greatly affected by rain fall both at the

time of flowering (April and May) & at the time of ripening (October & December) as in the case of coffee. If the crop fails in the year in which a man takes up the contract he may be ruined altogether, and this loss will act very prejudicially against future sales; but if he holds the contract for the next one or two years there is a likelihood of his making up the loss.

(3) Contractors have to give large advances to Coolies particularly to Kurumbars whom they employ for collecting the products - Unless they give such advances they cannot get their work done, but if the Coolies fail to show sufficient work during the year, the Contractor finds it extremely difficult and, in some cases quite impossible to recover his advances in the shape of work before the termination of his contract is over. Advances can never be recovered in the shape of money from Kurumbars. If the Contractor loses his contract for the succeeding year he has no work to

extract from such coolies and he often loses his advances altogether. Several instances of this kind have come to my notice. If however a contractor gets the lease for three years he can make proper arrangements for supervision and collection and will be in a position to recover his advances if not in one year at least in the next two years. If this suggestion is approved I am sure that purchasers will bid properly and fair amounts will be offered. They will have confidence in the work and will not look at it as a matter of lottery as they do at present. I very much doubt whether the suggestion made by Muddaveera Shetty of Honnur for changing the dates of sale will give satisfaction either to himself or to other contractors. But I fully believe that my proposal will be acceptable to them.

Minor Forest Produce.

Date and number of Government Proceedings	Subject No as in assembly Proceedings 2	Subject. 3	Existing orders or practice relating to the subject: 4.
Not available.	278.	Government Forest Produce being sold when the trees are in bearing.	The minor products are sold by auction in different Taluks as follows:-

Kadur Taluk. Here the produce is auctioned from July to September.

Tarikere Taluk. In this Taluk they are auctioned from June to July.

Mudgere Taluk. Here the sale takes place at the time of the Taluk Jamabandy (October or November)

Koppa.

Koppa Talak. The sale takes place here from April to end of July.

Yedahally Sub Talak

Here Gallnuts, Wax and Honey will be sold in May or June, Soap nut in october or November

Chickmaglur Talak.

Not received

(5) Detailed Report with proposals.

Kadur Amildar. It seems unnecessary to alter the present time of auction as purchasers can afford to judge the

the yeild of the product owing to the trees being in bearing at the time. In the case of Honey and Wax, the appropriate period would be April or May. Since these products are very limited they are auctioned along with other minor products, and in case these latter are separately auctioned at an earlier period, I doubt if any one would come forward to bid for the same

The following table gives the details of receipts from them for the last five years.

Assistant Conservator

21

Chief Clerk James Stuart

It will be seen from the above that the mineral produce in the ~~District~~ is auctioned from April to November, or at the time when the trees are in bearing; and no objection has been taken to the procedure by the purchasers of the ~~mineral~~ produce. The same may therefore be continued in future also. The complaint is evidently not from this District. Trees yielding mineral produce generally are in bearing from June to November, and the crops are harvested from December to March. Five years receipts from the produce are dealt with

with separately above in connection with the respective Taluks.

Gall nuts in the whole District has of late been brought under Amani cultivation.

Bees wax, Honey, horns are generally collected from April to June or before the setting in of monsoon.

The products if auctioned in April and May, may result in higher realizations.

But this is not the case at present

Yours obedient servant
Assistant Conservator
Kadur District.

Enclosures No. (One Statement)

General No. 199
No.

Sir,

In reply to Government proceedings No: 4146-54 in Cir 80 the matter of sale of Minor Forest produce I have the honor to forward herewith a statement shewing the particulars called for in the above.

From the statement received from the Talukes it is seen that April & May are the earliest months and July the latest, when the ~~---~~ produce has been hitherto generally sold.

I

It will be advantageous to put it off to a still later period i-e to August and September which is the time of Sultanee and when there is a better chance of getting more bidders and brisker bids.

I have the honor to be
Sir
your most obedient Servant

Deputy Commissioner.

Enclosures No. 2

General No. 344 of 1891
No. 4

Submitting copy of the Sub Asstt Conservator's letter together with a statement showing particulars for each item of the Minor Forest Produce as requested in Govt Pros No 4146-54 Cir '80 of the 4th July last.—

D/Commissioner's Office
Hassan district.

No. 344
F.

dated Haisan 16th Sept. 1891.

From.

The D/Commissioner
Hassan district.

To.

The Inspector General
of forests. —

Sir,

With reference to Government Proceedings no. 4146-54 cir: 80 of the 4th July last, regarding minor forest Produce, I have the honor to forward copy of the Sub Assistant Conservator's no 293 of the 7th ultimo together with a statement shewing particulars for each item of the minor Produce for the past 5 years as requested in the above. —

2. From the Statement it would be

be seen that the dates of sales held during the past 5 years vary in different places. The majority of Amildars propose the period between July and August as the best time for the sale of all fruit-bearing trees. The month of August as proposed by the Sub-Assistant Conservator appears to be the proper time for putting up all minor Forest Produce to Public auction. —

I have the honor to be,

Sir,

Your most obedient servant

Asst Conservator

Hassan district

Sub assistant Conservator's Office
Hassan District. —

Rev. Forest
No. 293. Rec.

Dated Hassan 7th August 1891.

To.

The Deputy Commissioner
Hassan District.

Sir,

With reference to your no. 25-4 dated 29th ultimo regarding the sale of minor forest produce, when the trees are in bearing, I have the honor to state that the most important of these products is pallaut, and although the tree flowers in the summer, and begins to bear about June, yet the young crop suffers from the western high winds. The nuts ripen about November and the collecting season there begins. The other produce too such as soap nut, Seepekai, — Hunsé, Honge and Sarekoi are

available for collection about the same time. I would therefore beg to propose that the auction sales of crop all fruit bearing trees may be held in august, as by that time the produce would developse fairly well to enable the intending purchasers to form an opinion as to the extent of the year's harvest. I beg to submit herewith the state-ment called for, but I cannot fill in columns 3 and 4 as the information is not available in this office, the produce having been sold by auctioneers. —

I have &c

Shimoga 14th September
1891

To

The Inspector General
of Forests and Plantations
in Mysore

Sir

With reference to Your
Pro: No. 4146-54 dated 4th July
ult 60
last I have the honor to
submit copy of the Offg
Forest Superintendent's docket
No 429 of the 20th July last.

2. A detailed statement
of the Minor Forest Produce
of District Forests sold in
the past 5 years is appended.

3. The total amount of
the annual sales of the
produce in the State
Forests, is annexed at the
end of the statement, as

the particulars for each item have not been furnished by the above officer.

4. The sale of the produce long before the season and without any knowledge of the state of crop is certainly most objectionable and highly prejudicial both to the interests of Government and the purchasers.

5. The sale must take place in season a month or two before the harvest, and at least a rough estimate of the produce, village-wise, should be prepared before the sale. It is in no way necessary that the produce in each Taluk should be sold in the same month. Each Taluk may notify

its own sale with a view to the local circumstances.

6. You are doubtless aware of that the subject has already been noticed by me, and I beg to request a reference to this office communications noted in the margin.

7. Necessary orders will be issued to the Taluk and Forest officers on the subject in due course.

I have the honor to be
Sir
Your most obed. Servt.

My Commrs No. 967 dated
309
13th Instant with copy of Govt.
Proceedings No. 4146-54 dated
cir. 80
4th idem drawing attention
to subject No. 276 (Govt Minor
Forest Produce should be
sold when the trees are in
leaving) brought up at the
meeting of the Nazrana
Representative assembly
held in October last
for submission of a
detailed report.

In reply has the

honor to submit that the
practice of selling such
minor produce as gall
nuts, Sikakai &c., but not
bees' wax, honey and horns,
in April and May, should
be corrected and such produce
put up to auction only
when the trees are in
bearing which is generally
towards the close of the
rains in August or September.
The collection season
does not commence till
about December so that
there is sufficient time
for the purchaser to
arrange for collection.
All further details required will
be supplied by the Assistants direct.

-1-

Chitaldroog District
Dy Commrs Office
Dated 19th September 1891.

Rec'd 22/9 cy
1794
23 SEP. 91
48
MYSORE PROVINCE

The Deputy Commissioner
Chitaldroog District.

To,

The Inspector General
of Forests & Plantns
in Mysore -

Sir,

With reference to Govern-
-ment Proceedings No: 4146-54
Cir: 80
of 4th July 1891, I have the honor to state
that certain items of Forest Produce,
such as Gallnut, "Kalhoovu", Soap
nut, jali pods & cane into bearing
as Early as July, while other items
of Forest Produce, such as, lac,
Muddichakke, Gum, Byaladachak-
-ke, Sone chakke, are not produced
till February. The period of bearing
thus varies from July to February
and the collection lasts from
January to March, except with
regard to honey and Bees wax

which are collected from February to May.

2. All the items of Forest Produce are sold Talukwar in this District. In the Holalkere Taluk, however, it is sold villagewar and I can assign no reason for this Exceptional practice being in force in that Taluk.

3. In all the Taluks the sales take place from July to September simultaneously with the Hoolkaum Sales, Except in the Hiriyur Taluk where the sale of the Minor Forest Produce is held in April or May.

4. In the year 1889-90, however, the Minor Forest Produce of the Taluks of Chitaldroog, Jagalur and Hiriyur was sold for 3 years ending 31st March 1892.

5. The amount realized by the sale of the Minor Forest Produce in the several Taluks of the District for the past 5 years is shown below

below:—

Taluks.	1886-87			1887-88			1888-89			1889-90			1890-91.		
Chitaldroog	51	2	.	108	7	.	119	8	.	572	15	.	22	4	.
Challakere	576	10	.	527	15	.	671	1	.	718	2	.	995	12	.
Hiriyur	30	.	.	41	.	.	53	8	.	86	.	.	86	.	.
Holalkere	92	4	.	63	3	.	61	10	.	56	6	.	58	.	.
Davangere	"	"	"	"	"	"	"	"	"	1	"	"	3	12	.
Jagalur	20	.	.	21	"	.	82	"	.	103	5	4	103	5	4
Hiriyalur	488	12	.	461	8	.	499	8	.	527	12	.	674	8	.
Hosdurg Range.	"	"	"	"	"	"	"	"	"	"	"	"	12	8	.
Total	1247	12	.	1273	1	.	1480	13	.	2065	8	4	1956	1	4

6. The Amildars in the District are unanimously of opinion that the sale of the Forest Produce should be held as heretofore at the time of the Hoolbanni sales, when there is a large gathering of ryots and when there is a good opportunity of securing more bidders than at other times. The Amildar of Chitaldroog however advocates the sale being held later on, when the trees are in full bearing

that do, in October or November.

7. To hold the sales when the different Kinds of Forest Produce are in actual bearing has indeed its own advantages, but I should very much prefer to adhere to the existing practice of holding the sales of Forest Produce at the time of the Hoolbamie sales.

8. The statement called for in Government Proceedings under reference is herewith submitted.

I have the honor to be

Sir,

Your most obedient Servant

Alexander Kennedy
Deputy Commissioner
Chittagong Dists.

Copy of subject no: 278 discussed at the Representative assembly at Mpone in 1890. —

Subject no: 278.

Government Minor Forest Produce should be sold when trees are in bearing.

Summary of discussion - Minor Forest Produce is sold in April and May - It should be sold later in the year when the trees are in bearing - This would help intending purchasers to judge better what they may offer at auction - Bees' wax, honey, horns and such like may be sold in April and May as at present.

Devas's reply - The subject will be referred to the Forest Department for consider-ation -
